

IMCO

*“A sterling reputation
is the best recommendation”*

Harness experience and performance

A track record of decades

For close to four decades, IMCO has been customizing, supplying and supporting a full line of military sub-systems and products for uncompromising defense customers.

From electrical harnesses and electromechanical devices to LED lighting systems, the IMCO Group's teams in Israel and the United States can be relied upon to surpass expectations.

As testimony, IMCO is the main supplier of electrical systems for the Merkava tank and the Namer APC for more than 35 years, since the development of the first generation of this combat-proven, frontline tank.

Tested performance and extended life cycles are the core of IMCO's reputation.

The Israel Defense Forces, other modern armed forces, and demanding defense manufacturers have designated IMCO a preferred supplier.

Through flexible partnering in development, mil-spec production and on-schedule deliveries, IMCO has succeeded in building and strengthening long-term relationships.

Harness dedication and professionalism

Teams that ensure excellence and satisfaction

IMCO's philosophy is that the most sophisticated equipment and instruments are only as good as the infrastructure for design, production and quality assurance.

IMCO's employees regard the company as a "second family" – loyally contributing experience, determination and vision over many years, and even decades. They value participating in a corporate culture that nurtures and rewards innovative thinking, cooperation and total dedication.

The Group's engineers, technicians, production line workers, QA supervisors and management consistently strive for excellence. Long-term customer loyalty is the reward.

Harness reliability and commitment

Every detail is significant

The defense industry is the most demanding in the world. Reliability is the integrated result of design, production, quality assurance and support. In every category IMCO meets and often exceeds international standards.

IMCO's long-term commitment to the customer is one of integrity, responsiveness and responsibility. Customers can rely on IMCO teams and professionals to be there when and where they are needed.

Areas of Activity

Electrical systems:

- Power, Control and a full range of communication harnesses
- Control, command, junction and distribution electrical boxes
- Driver and commander control panels

Design, production and integration of electrical and mechanical components.

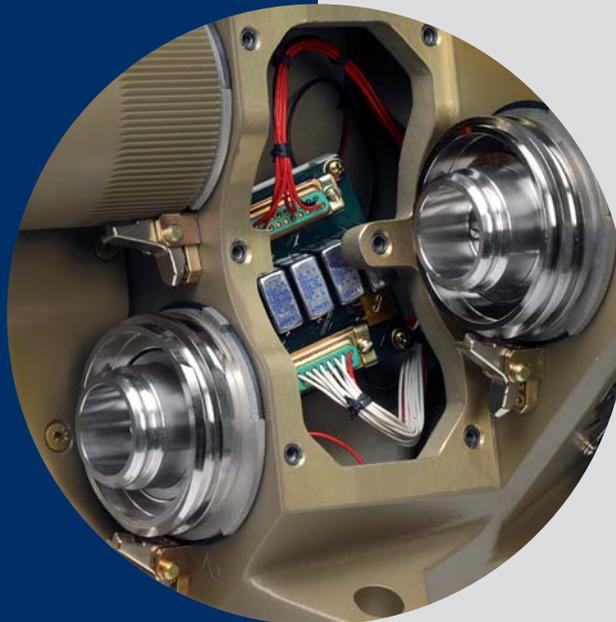

Electro-mechanical products and systems:

- Pilot joysticks
- Throttles, tank commander and gunner turret control handles
- Driver and commander control panels
- Slip rings
- Smoke grenade launchers (SGL)
- Pitot tubes
- Fuel sensors

LED lighting for land armored fighting vehicles – tracked and wheeled including: internal, external, rear and front lighting.

Main defense markets and platforms

- **Land system platforms:** Tanks, armored fighting vehicles, APCs, artillery systems, combat engineering vehicles, and mine clearance equipment
- **Airborne platforms:** Aircraft, helicopters
- **Missiles and Unmanned Aerial Vehicles (UAV)**
- **Naval platforms:** Vessels, corvettes, submarines, fast patrol boats, missile boats

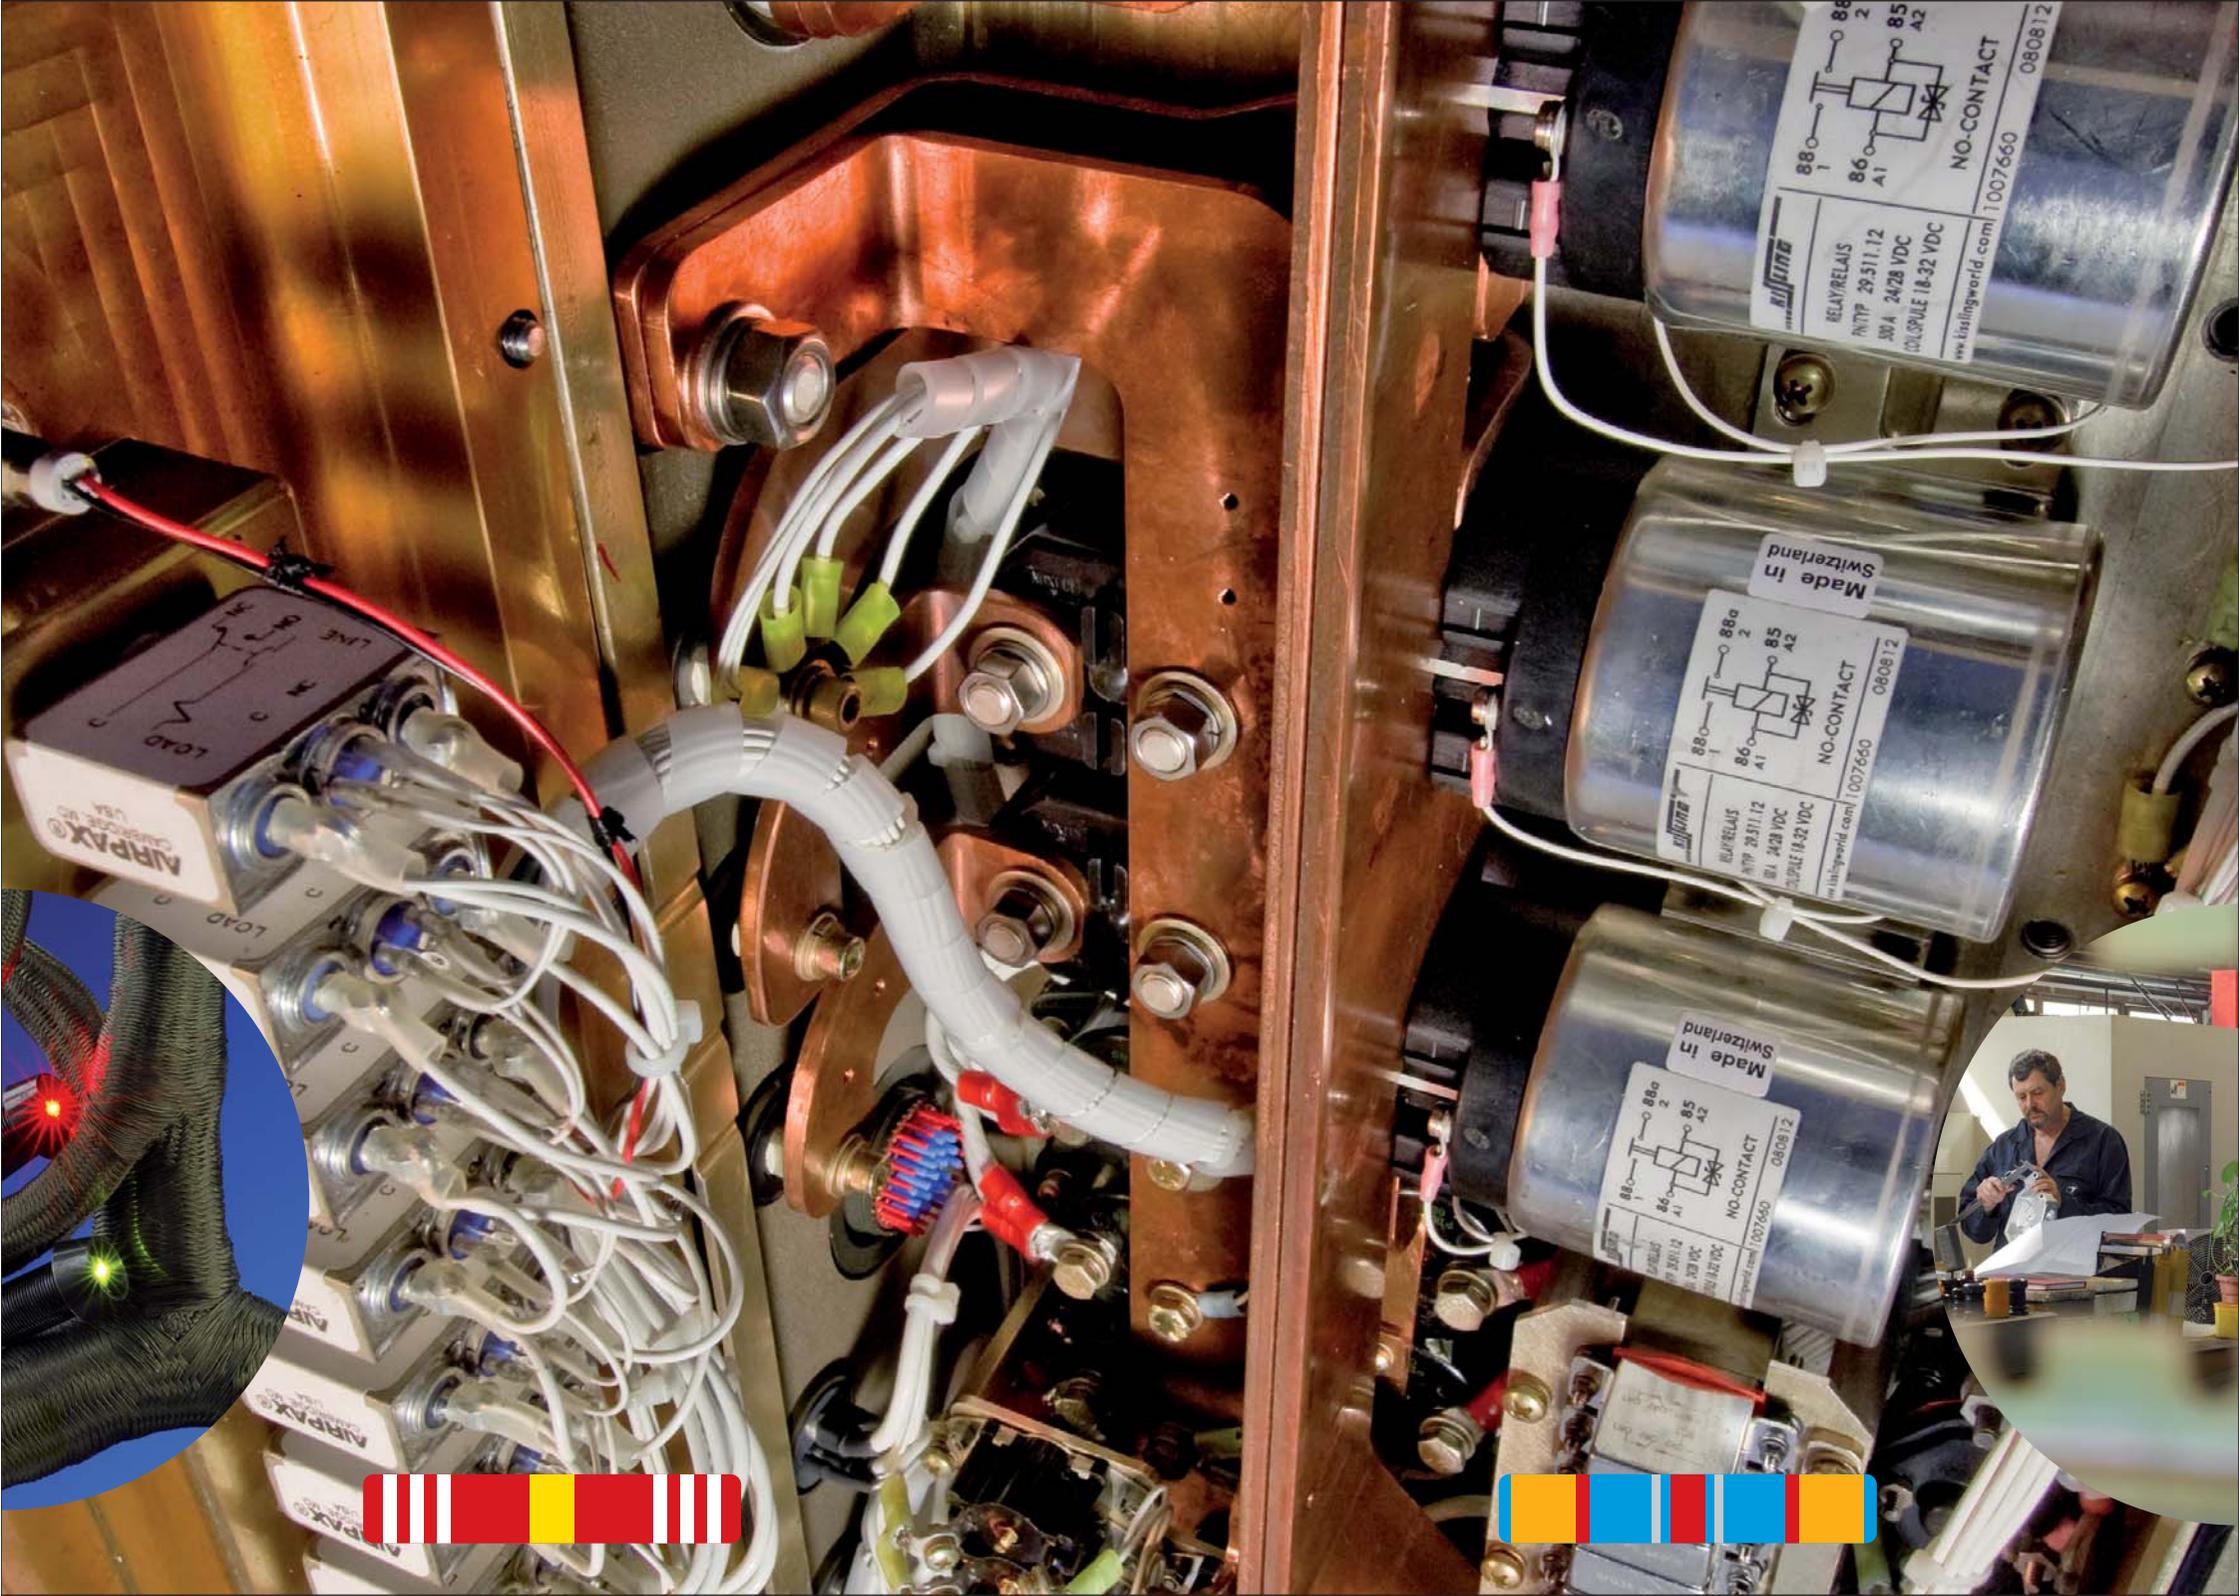

Harness expertise and flexibility Unique technologies that make a difference

In each area of competency, IMCO delivers attributes that add value.

- Electrical and electronic cable harnesses feature customized braiding adapted to airborne applications.
- Machining excellence developed for airborne sub-systems for highly accurate production of structural elements.
- Communication cable harnesses with especially demanding specs find a complete response at IMCO.
- Pilot joysticks and throttles incorporate sand casting technology for the highest accuracy at particularly competitive prices.

Facts Profile

Facilities

- 8,500 sq. m
- In-house mechanical design
- Automatic Test Equipment (ATE)
- CAD, CAM and ECAD systems (AutoCAD)
- Computerized Numeric Controlled (CNC) machines, milling machines and lathes
- In-house production and assembly lines with expandable capacity
- Quality Assurance to meet military international standards for in-process and final testing.

The IMCO Group

The IMCO Group comprises IMCO Industries Ltd. (Tel Aviv Stock Exchange-TASE: IMCO), and its subsidiaries:

- Advanced Defense Technologies Inc. (ADT), Baltimore, U.S.
- Atena Ltd., Israel for commercial and medical markets
- Nir-Or (Israel) Ltd. for advanced displays, computers and controllers

The Group employs more than 300 employees.

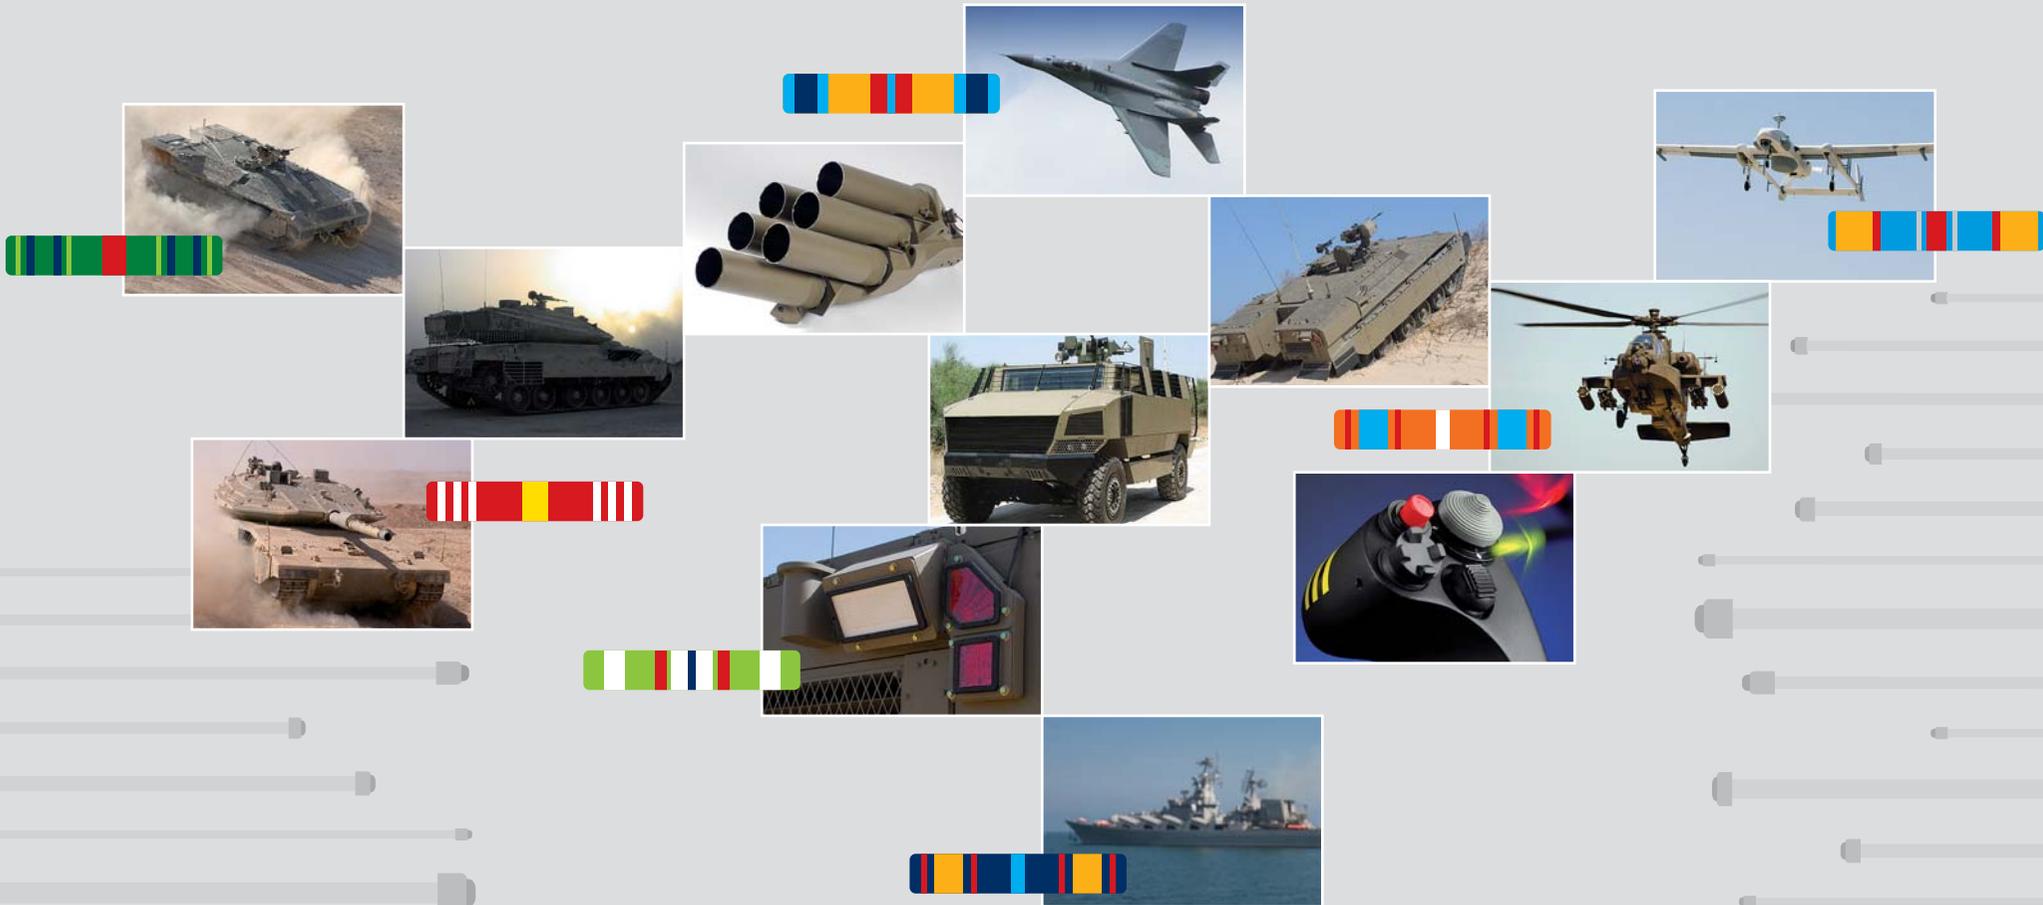

IMCO's quality assurance program exceeds the requirements of ISO-9001, MIL-I-45208, AS-9100 and IPC/WHNA-A-620.

Meet IMCO

IMCO, a leading Israeli company, specializes in the development, design and production of mechanical, electro-mechanical, electrical and electronic products, assemblies and sub-assemblies for airborne, tank/armored vehicle and naval applications.

Imco Headquarters:

POB 189 Tel-Hanan 20302, Israel

Tel: +972-4-821-3322
